BILATERAL MEETINGS

10.00 a.m. - 13.00 p.m.

14.00 p.m. - 17.00 p.m

DESCRIPTION Mojo Maritime provide Marine Operations Management and Consultancy Services to the Offshore Renewable Energy Sector. They are unique in that they combine practical installation experience with a strong consultancy based approach. This allows them to use their multi-disciplined team to develop innovative risk and cost reducing solutions. Mojo's experienced team of Analysts, Engineers, Naval Architects and Master Mariners have built a successful track record supporting multiple high profile projects in the offshore wind, wave and tidal energy sectors. The company is now moving into a new phase with the development of innovative products, such as the HF4 vessel, which have been designed to meet the needs of the offshore renewable industry.

Offer

MERMAID

Managing the weather risk on sophisticated marine operations has always been tough. In response to this problem, Mojo Maritime have developed Mermaid, a unique planning and risk optimisation tool. Mermaid models operations down to the minute, outpacing traditional exceedence analysis. It also understands that the weather varies across your operation, outsmarting simple weather windowing. Mermaid flourishes when you use multiple vessels, ports and teams. And unlike generic project management tools, it doesn't assume that your operation stops at night.

COOPERATION OFFERED

1. Commercial co-operation
