BILATERAL MEETINGS

10.00 a.m. - 13.00 p.m.

14.00 p.m. - 17.00 p.m.

DESCRIPTION Blue Energy, Lda is a spin-off recently founded to develop a new wave energy harnessing device. The device is invisible at surface water level and captures both the pressure and the kinetic energy of the wave in order to drive a submerged very low head hydropower turbine. The device will be installed nearshore on the sea bed at low deeps. The device is called REEFS (Renewable Electric Energy From Sea) as it may provide some shore protection by wave breaking like natural reefs do.
