14.00 p.m. - 17.00 p.m

### DESCRIPTION

Principle Power is a technology developer focused on the intermediate and deep-water depth (greater than 40 meters) offshore wind energy market. Principle Power's enabling product, a floating wind turbine foundation called WindFloat, provides for siting of offshore wind turbines independent of water depth, thus exploiting the world's highest capacity wind resources. In October, 2011, Principle Power deployed a full-scale prototype WindFloat 5km off the coast of Aguçadoura, Portugal.
